

⑤ understanding browser & web API

2nd Section

1) callbacks

- ↳ when a funcⁿ can be passed as an arg., and it can be called later in time, this fn is known as cb fn.

Callbacks are painful?

setTimeout(cb, 5000) →

cb → execute

5000 → 5s

↳ asynchronous opⁿ

↳ Synchronous, single threaded

Main thread | ? (2)

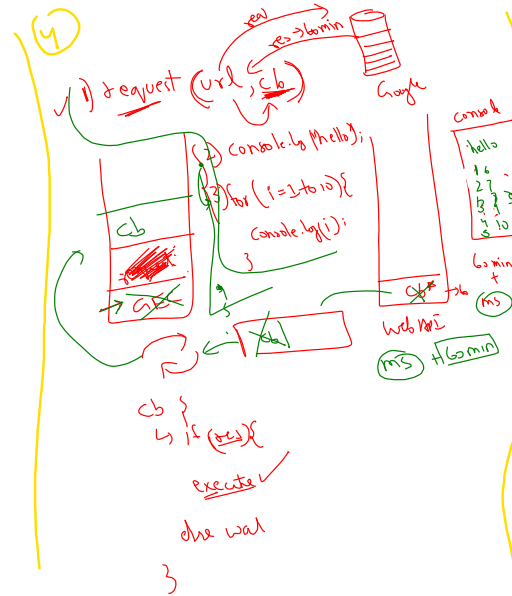

single threaded lang

Q) what do you

understand from blocking the main thread?

Call Stack:
||
main thread

proc; time consuming
→ async

[illegible]

web API's
